

CREW WORKLOAD STRATEGIES IN ADVANCED COCKPITS

**Sandra G. Hart
NASA Ames Research Center**

ABSTRACT

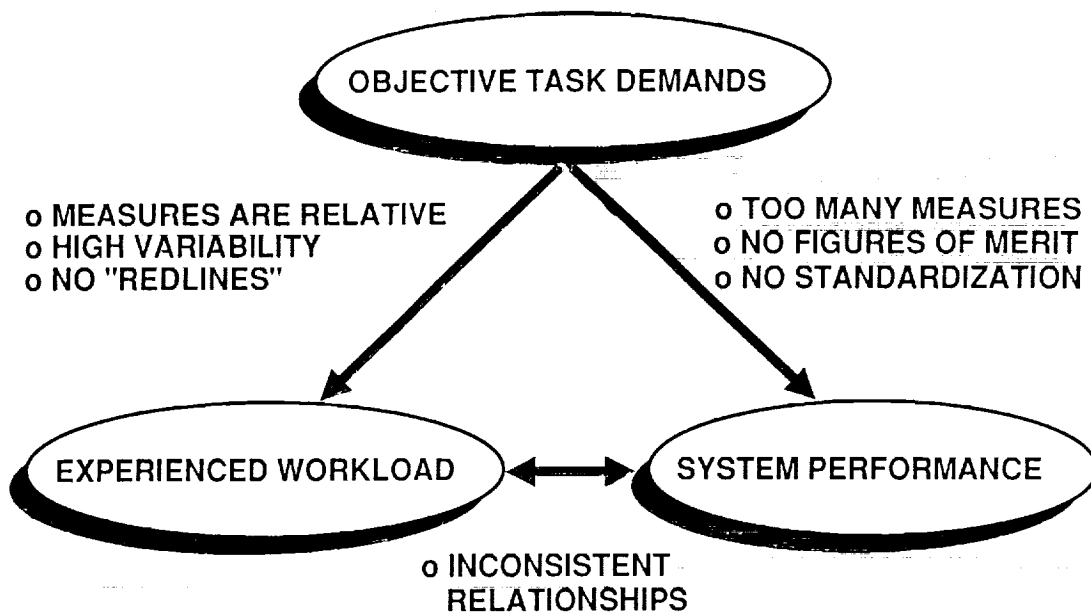

Many methods of measuring and predicting operator workload have been developed that provide useful information in the design, evaluation, and operation of complex systems and which aid in developing models of human attention and performance. However, the relationships between such measures, imposed task demands, and measures of performance remain complex and even contradictory. It appears that we have ignored an important factor: people do not passively translate task demands into performance. Rather, they actively manage their time, resources, and effort to achieve an acceptable level of performance while maintaining a comfortable level of workload. While such adaptive, creative, and strategic behaviors are the primary reason that human operators remain an essential component of all advanced man-machine systems, they also result in individual differences in the way people respond to the same task demands and inconsistent relationships among measures. Finally, we are able to measure workload and performance, but interpreting such measures remains difficult; it is still not clear how much workload is "too much" or "too little" nor the consequences of suboptimal workload on system performance and the mental, physical, and emotional well-being of the human operators. The rationale and philosophy of a program of research developed to address these issues will be reviewed and contrasted to traditional methods of defining, measuring, and predicting human operator workload.

PREVIOUS RESEARCH GOALS

TO EXPLAIN, QUANTIFY, AND PREDICT RELATIONSHIPS AMONG:

LESSONS LEARNED

EFFECTIVENESS OF COMPUTER-GAME TRAINER IN IMPROVING WORKLOAD MANGEMENT SKILLS

EFFECTIVENESS OF AUTOMATION IN RELEASING RESOURCES TO PERFORM OTHER TASKS

ORIGINAL PAGE IS
OF POOR QUALITY

ELEMENT 4: METHODS OF IMPROVING STRATEGIES

	FY89	FY90	FY91	FY92	FY93
MILESTONES: IDENTIFY OPTIMAL STRATEGIES FOR TYPICAL FLIGHT TASKS AND SITUATIONS DEVELOP TRAINING PROCEDURES TO IMPROVE PILOTS' MANAGEMENT OF TIME/RESOURCES, STRATEGY SHIFTS APPROPRIATE FOR STATE DEVELOP CONCEPTUAL DESIGNS FOR COMPUTER AIDS TO IMPROVE PILOTS' ABILITIES TO SELECT APPROPRIATE PLANS, STRATEGIES AND TACTICS TEST CONCEPTUAL DESIGNS FOR INFLIGHT ADAPTIVE SYSTEMS FOR DYNAMIC TASK ALLOCATION					

INDIVIDUAL DIFFERENCES IN SUBJECTIVE WORKLOAD "REDLINES"

BOREDOM: PERFORMANCE/PHYSIOLOGICAL CORRELATES

PHYSIOLOGICAL MEASURES

AVERAGED DATA FROM 11 SUBJECTS SHOWS CORRELATION OF 3 PHYSIOLOGICAL MEASURES

SYMPTOMS OF UNDER/OVERLOAD STATES

WORKLOAD		SUBJECTIVE EXPERIENCE:	PHYSIOLOGICAL INDICES:	STRATEGIES	PERFORMANCE:
UNACCEPTABLE (TOO HIGH)		OVER-WHELMED	SIGNIFICANT CHANGE	NONE	UNACCEPTABLE
SUBOPTIMAL		STRESSED	SOME CHANGE	COMPENSATION: - SHED - DEFER	ACCEPTABLE
OPTIMAL		COMFORTABLE	"NORMAL"	MANAGE TASK DEMANDS	GOOD
SUBOPTIMAL		BORED	SOME CHANGE	COMPENSATION: TRIES TO MAINTAIN AROUSAL	ACCEPTABLE
UNACCEPTABLE (TOO LOW)		DROWSY	SIGNIFICANT CHANGE	UNPREPARED	POOR

ELEMENT 3: WORKLOAD "RED-LINES"

	FY89	FY90	FY91	FY92	FY93
MILESTONES:					
IDENTIFY VARIABLES ASSOCIATED WITH UNDER/OVERLOAD					
IDENTIFY PERFORMANCE /PHYSIOLOGICAL CORRELATES OF SUBJECTIVE OVER/UNDERLOAD STATES					
INVESTIGATE ROLE OF INDIVIDUAL DIFFERENCES IN PERSONAL WORKLOAD CRITERIA					
QUANTIFY IMPACT OF STRATEGIES IN DYNAMIC WORKLOAD/PERFORMANCE TRADEOFFS					
MODEL WORKLOAD/PERFORMANCE TRADEOFFS					
QUANTIFY OVER/UNDERLOAD REGIONS FOR WORKLOAD MEASURES					
DEVELOP STANDARD PROCEDURES FOR AIRCRAFT CERTIFICATION					

SCHEDULING THEORY MODELS OF WORKLOAD

INFLUENCE OF STRATEGY ON RATED WORKLOAD

SHORTEST PROCESSING TIME

EARLIEST DUE DATE DISPLAY

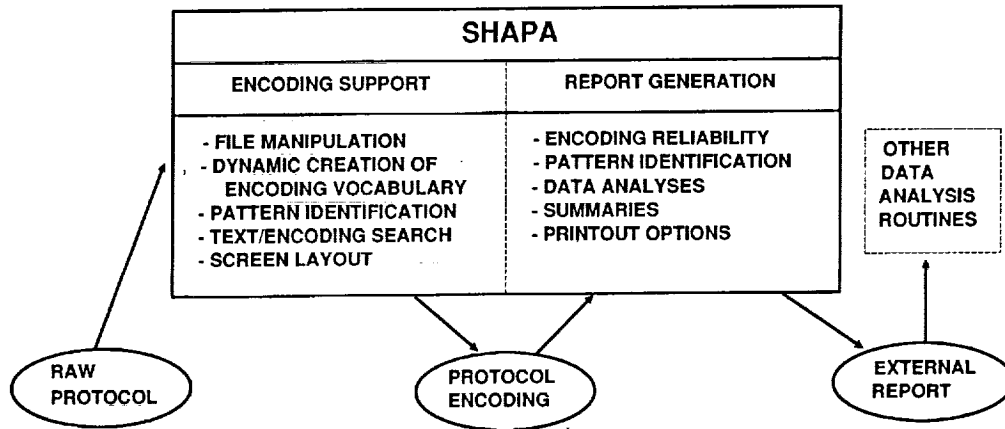

TEMPORAL DYNAMICS OF MENTAL WORKLOAD

TARGET SEQUENCE

SHAPA: VERBAL/NONVERBAL PROTOCOL ANALYSIS TOOL

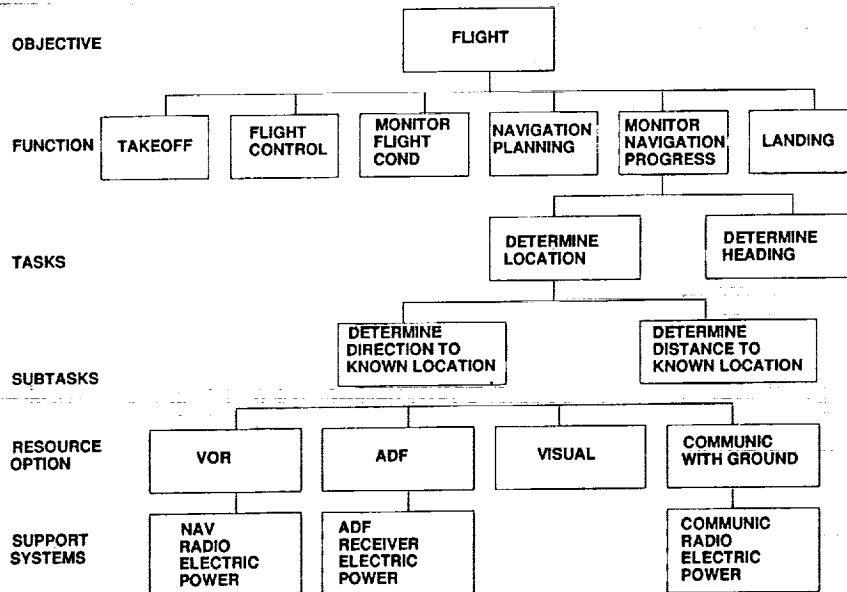

FEATURES:

- RUNS ON IBM-AT WITH EGA
- FULLY INTERACTIVE
- ENCODER DETERMINES ENCODING MODEL/THEORY
- FASTER ENCODING
- CHOICE OF DATA ANALYSIS TECHNIQUES
- DIRECT ENGAGEMENT WITH DATA

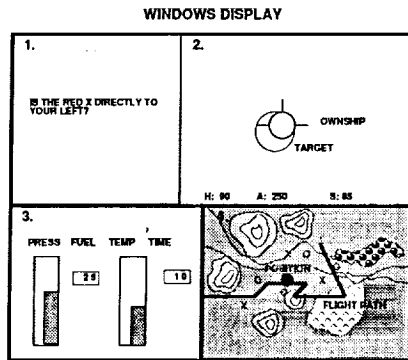

UNDER DEVELOPMENT: MacSHAPA

- MULTIPLE INTERACTING AGENTS
- MULTIPLE STREAMS OF VERBAL AND NON-VERBAL BEHAVIORS
- MULTIPLE ENCODERS/RESEARCHERS
- VISUALIZATION TOOLS

MODEL FOR CODING VERBAL PROTOCOLS TO ASSESS PILOT STRATEGIES

WORKLOAD /PERFORMANCE FOR COMPONENT TASKS

EXAMPLE 2:

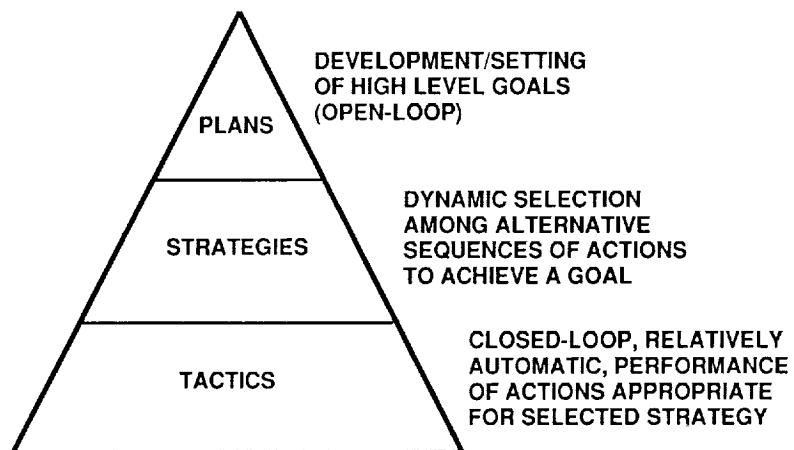

HYPOTHETICAL RELATIONSHIPS BETWEEN TASK DEMANDS, EFFORT, MEASURES OF PERFORMANCE, AND WORKLOAD

PILOTS ADOPT DIFFERENT STRATEGIES WITHIN A FLIGHT

CHARACTERISTICS OF STRATEGIC BEHAVIORS

ELEMENT 2: STRATEGIC BEHAVIOR

	FY89	FY90	FY91	FY92	FY93
MILESTONES:					
DEVELOP COMMON RESEARCH ENVIRONMENT FOR PROGRAM PARTICIPANTS					
ADOPT STANDARD METHOD OF IDENTIFYING STRATEGIES					
QUANTIFY PERFORMANCE/WORKLOAD CORRELATES OF SPECIFIC STRATEGIES/STRATEGY SHIFTS					
INVESTIGATE ROLE OF PILOT STATE AND INDIVIDUAL DIFFERENCES ON STRATEGIC BEHAVIOR					
CLASSIFY STRATEGIES TYPICAL OF VARIOUS TASKS, ENVIRONMENTS					
DETERMINE WHY PILOTS ADOPT OR ABANDON PLANS AND STRATEGIES					
QUANTIFY RELATIONSHIP BETWEEN STRATEGIES, WORKLOAD, AND PERFORMANCE IN FLIGHT					

FIGURES OF MERIT - II

GOAL:

IDENTIFY A PARSIMONIOUS SET OF VARIABLES WHICH, IN COMBINATION, ARE DESCRIPTIVE OF THE INFLUENCE OF THE PILOT/VEHICLE INTERFACE DESIGN AND PILOT'S INTENT ON SYSTEM PERFORMANCE

APPROACH:

- SELECT 50 VARIABLES FROM THOSE ALREADY AVAILABLE
- MONITOR PERFORMANCE OF NOVICE AND EXPERT PILOTS IN AFTI F-16 DURING:
 - AIR-TO-AIR MISSION
 - TERRAIN-FOLLOWING MISSION
- MEASURE PILOT WORKLOAD USING SWAT
- SELECT PARSIMONIOUS SET OF VARIABLES USING MULTI-DIMENSIONAL SCALING, CLUSTER ANALYSIS, ETC
 - IDENTIFY REDUNDANT MEASURES
 - IDENTIFY MEASURES THAT PROVIDE UNIQUE INFORMATION
 - COMBINE SOME MEASURES TO CHARACTERIZE A PARTICULAR ASPECT OF PERFORMANCE

FIGURES OF MERIT - I

GOAL:

DEVELOP COMPOSITE FIGURE OF MERIT FOR PERFORMANCE

APPROACH:

- EXPERIMENTAL TASK (SCORE):
 - 10-MIN TRIALS
 - 2nd-ORDER, 1-AXIS PURSUIT TRACKING
 - MONITOR 8 DIALS
 - ONLINE SUBTASK PERFORMANCE FEEDBACK
- FIGURE OF MERIT
 - EQUALLY WEIGHTED AVERAGE OF:
 - TRACKING (% MAX ERROR; 1-10)
 - MONITORING (% MAX ERROR; 1-10)
 - SELF EVALUATION (ONCE PER MIN)

RESULTS:

- Ss FOCUSED ON TRACKING (BASED ON PERFORMANCE STRATEGY, SELF RATING)
- EQUAL WEIGHTING INAPPROPRIATE

FIGURES OF MERIT ARE NEEDED THAT CAPTURE THE QUALITY OF OVERALL PERFORMANCE

PROGRAM ELEMENTS/MAJOR MILESTONES

GOALS:	FY89	FY90	FY91	FY92	FY93
ESTABLISH MOA					
DEVELOP PERFORMANCE FIGURES OF MERIT					
QUANTIFY EFFECTS OF STRATEGIC BEHAVIOR, PILOT STATE					
IDENTIFY EVALUATION CRITERIA FOR WORKLOAD MEASURES					
IMPROVE PILOTS' ABILITIES TO MANAGE WORKLOAD EXTREMES					

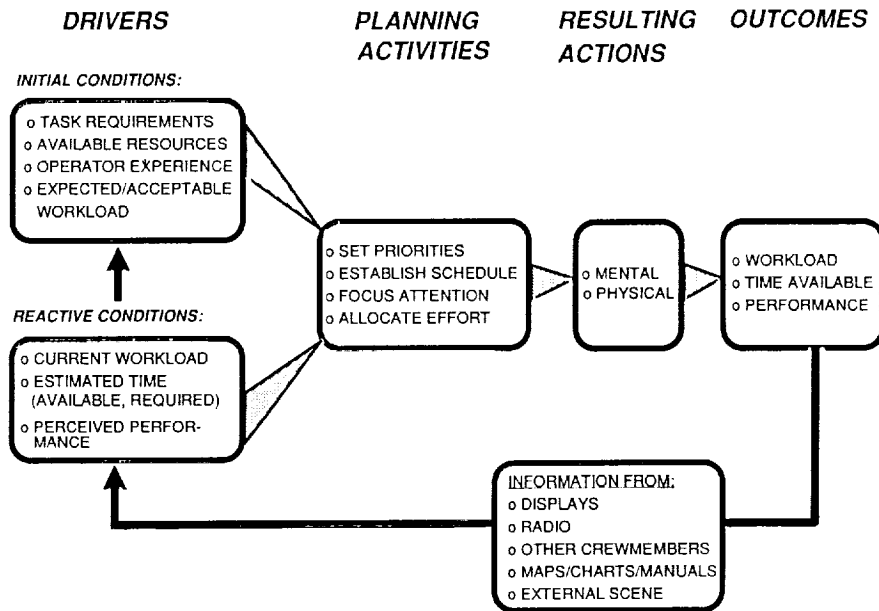

PRODUCTS:

1. PREDICTIVE TOOLS FOR SYSTEM DESIGNERS
2. STANDARD EVALUATION PROCEDURES FOR AIRCRAFT CERTIFICATION
3. IMPROVED THEORETICAL MODEL OF WORKLOAD
4. WORKLOAD-MANAGEMENT TRAINING CONCEPTS
5. ADAPTIVE COMPUTER AIDS TO IMPROVE TASK ALLOCATION

PROPOSED EXPLANATION

PROPOSED DYNAMIC CONCEPT OF WORKLOAD

CURRENT CONCEPTUALIZATIONS OF WORKLOAD GENERALLY IGNORE THE DYNAMIC, ADAPTIVE, CREATIVE BEHAVIOR OF HUMAN OPERATORS
